

A photograph of a modern outdoor pool area. The pool is rectangular with clear blue water. It is surrounded by a light-colored concrete deck. A black metal fence with vertical bars runs along the right and back sides of the pool. In the background, there is a white house with a dark roof and a stone wall. The scene is set in a lush, green environment with many trees.

ELITE OUTDOOR DESIGN
AND CONSTRUCT

Everything starts with you

You provide the backdrop, the blank canvas, the dream and the dynamic.

You inspire us to design and create... transforming your space into something individual, sustainable, functional and beautiful.

At Elite Outdoor Design and Construct, the process is seamless and easy – we are your consultants, designers, landscapers, pool builders and single point of contact. We may even become your friends.

We get a lot of satisfaction seeing a design unfold and transform a space, particularly the joy it brings to our clients... a space to be loved for many years.

About Us

We are Ky Oliver and Stephanie Walton, partners in business and life, and passionate about both.

Ky began as an apprentice landscaper straight after school. His amazing drive and natural ability soon led him to start his own landscaping business. But it wasn't to be just any landscaping business... Elite Outdoor Design and Construct had to live up to its name. That's exactly what Ky and Steph have achieved.

Steph is your introduction to EODC, your point of contact and your co-ordinator... Steph makes sure everyone is on the same page, so the process is streamline and enjoyable.

But we would be nowhere without our fantastic crew who take such pride in what they do.

Design

Love at first design...

Wait until you see the plans for your new space... inspired by your ideas, your need for functionality, your lifestyle and your taste... it'll be love at first design.

And when we say plans, we mean 2D landscape drawings, 3D rendered designs and amazing 3D fly-through videos... it's like a dream brought to life.

Design and Construct...

Our Design and Construct service is inspiring and exciting. It's like a dynamic 'before and after'.

A huge amount of consideration goes into each design – location, aspect, climate, materials, plants, soil type and whole lot of other things.

Having a budget helps us create a far more realistic vision of your dream space. And, of course, there are so many design and construction options we can talk through to make it happen.

Landscaping

Everything outdoors...

EODC is so much more than plants and paving. We do everything outdoors – alfresco areas, outdoor kitchens, pizza ovens, fire pits, pergolas, pools and pool rooms. Basically, if you can imagine it, we can landscape and construct it.

But it takes planning, particularly if you're building a new home or putting on an extension. Ideally, we'd partner with your architect (at the working drawings stage) so that the landscaping is an integral part of your home's design, optimising functionality as well as design.

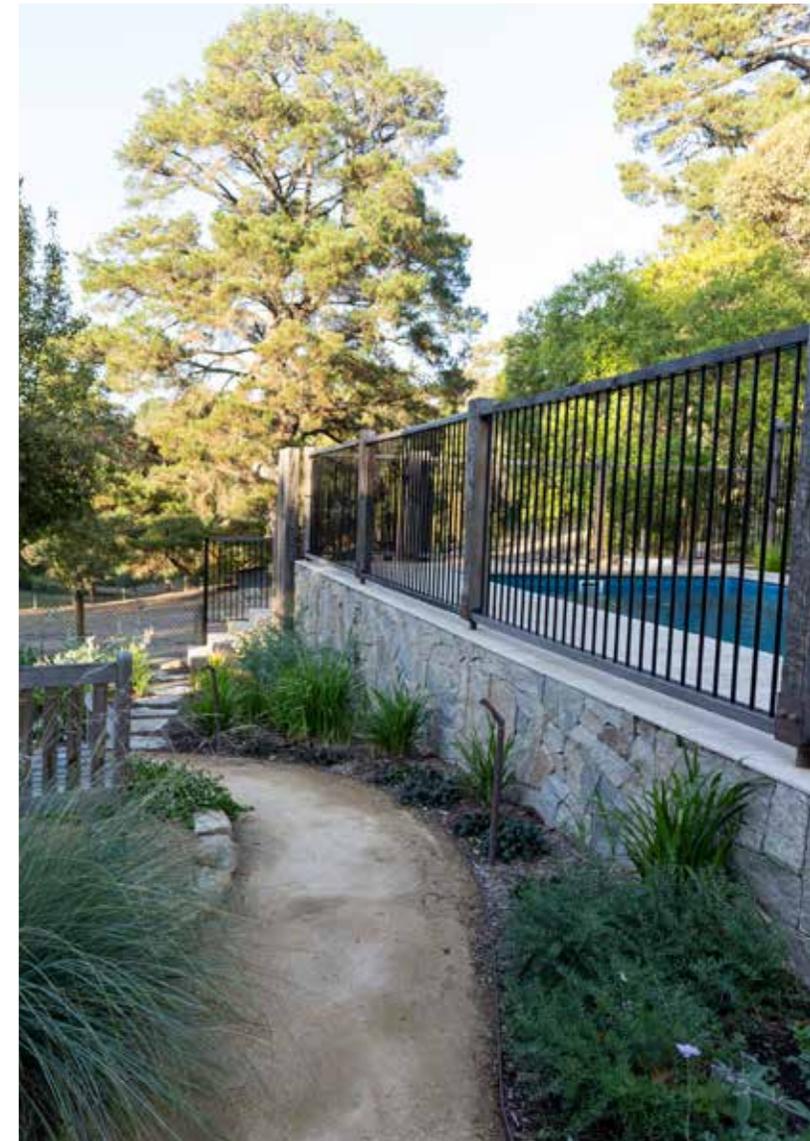

We are also happy to construct from existing landscaping designs.

Everyone's passionate...

Everyone at EODC is passionate about landscaping; we take pride in our work, have an unwavering attention to detail, and respect the space we work in. Each landscaping team has a permanent onsite supervisor to ensure project quality and progression, and, importantly, to communicate and answer any questions you may have.

Our hope is that you enjoy the process as much as the amazing transformation.

Pools

No limitations...

EODC design and install custom concrete pools. The beauty of concrete is that you can create exactly what you want – there are no limitations on shape, depth and size. And all our pools are equipped with the latest technology filtration systems for easy maintenance and crystal clear splashes.

Direct consultation...

Creating your pool is straightforward with EODC because we consult directly with you during design and construction. Expectations and timelines are important, and it's important to us that you stay informed throughout the process. And, of course, we take care of engineering and planning submissions to council.

In the end, you'll love your pool; its setting and environment, and the way it brings people together.

BioTop Pools

Natural beauty...

Like most people these days, we care about the environment, and endeavour to make a positive impact where we can, which is why we've imported the amazing BioTop pool technology from Austria.

It allows us to construct chemical free pools that are simply stunning. There are two types of BioTop Pools— Natural and Living.

Natural Pools are like ponds, surrounded by plant systems, blending seamlessly into your space and creating a natural, clean swimming environment on a bed of foot friendly gravel – it's like having your own pristine oasis.

Living Pools are concrete pools, but all impurities and bacteria are removed from the water by a biological filter system, eradicating the need for (not so friendly) chemicals.

Naturally, we love everything about BioTop pools – they're a glimpse into the not so distant future.
