

### Maximum Commitment

We are committed to bringing you the best energy solution, both for today and into the future. Our strategies are built around three key influences: Affordability, Reliability and Efficiency. They are inherent part of every project we undertake, whether it's Strategy Development and Planning, Design and Implementation or Data Management and Reporting.

### Maximum Energy

Maximum Energy was established in 2013, originally as an LED lighting solutions company. However, we soon realised there were many segments of the energy market that weren't being serviced. There was (and still is) a lot of confusion surrounding the viability and sustainability of various energy platforms. By 2016, Maximum Energy had transformed into a holistic energy solutions provider, partnering organisations like McDonalds Australia in designing and implementing effective ongoing energy strategies.

We are passionate about creating a sustainable future. By partnering with companies, organisations and governments we are helping to reduce energy use. Our partners benefit financially, but they're also being environmentally responsible and contributing to a better, cleaner Earth. It's a positive (and powerful) brand association.

Not only do we live and breathe energy, we have energy – in the way we work, in our delivery and in our support. We don't do things by halves in attaining positive outcomes for our clients.

“Your partner in energy strategy for a sustainable future.”

### Maximum Support

Every project is a partnership. From consultation to implementation, we update and inform (with dedicated personnel remaining points of contact throughout the project). We provide ongoing support to maintain or reduce your energy consumption.

Our highly qualified team is dedicated to delivering world's best energy solutions, drawn from a wealth of experience in the Australian, Asian and European markets. We have the expertise to develop and implement a wide range of energy solutions, yet we've maintained our ability to be responsive and flexible.

Our team includes:

- Electrical Engineers
- Project Managers
- Industry Experts and Consultants
- Support Staff

Our products and services include:

- Energy Strategy Management
- Electricity Procurement
- Solar PV Systems and Batteries
- Demand Management
- Power Purchase Agreements (PPA)
- Specialist Lighting (Smart LED, Sports Lighting)
- Intelligent Street Lighting for Smart Cities
- Smart Control Systems
- Heating, Ventilation, Air Conditioning (HVAC)
- Operations and Maintenance

“ We design and implement the energy solutions for the businesses of tomorrow. ”

#### Maximum Integrity

We have built this business on our desire for a sustainable world, with all the benefits that brings... from lifestyle to economics.

We are intrinsically motivated to provide best energy solutions, encompassing all levels of consumers: individual, company, industry and government.

We take a collaborative approach in providing our expertise; responding to the specific requirements of every project with respect and understanding, while maintaining best outcome practices.

We are associated with the following organisations:

- Indi Services (Indigenous Business Consortium)
- International Leaders
- The Executive Connection (TEC)
- Business SA Member
- Clean Energy Council
- Smarter Energy Investments

#### Maximum Safety

Safety is incredibly important for us. The hazards of working in an electrical environment are never underestimated. We are CM3 prequalified, which means we adhere to the highest OHS and WHS standards, and that extends to all our subcontractors. Put simply, there is no compromise where people's health and safety are concerned.

#### Maximum Trust

We employ the latest global technologies which not only bring the best energy solutions, but also provide exceptional value to our clients; every product or installation is backed up by our extended warranties and national network of specialists.

That's why we've earned the trust of many national, multi-site businesses across a wide range of industries. It's also why we're continuing to grow.

Our clients include:

- JLL
- McDonalds Australia
- Southern Cross Care (Aged Care)
- Catholic Schools Australia
- Charter Hall
- Savills
- Cheap as Chips
- CavPower
- Western Hospital
- Christian Brothers College
- Mount Barker Council

Industries served:

- Education
- Automotive
- Clean Energy
- Construction and Engineering
- Defence
- Health
- Manufacturing
- Resources (Oil, Gas and Energy)
- Retail, Trade and other Services
- Transport

### Maximum Transparency

We are driven by our outstanding results, and the positive impact they have on individuals, businesses and communities.

Our state-of-the-art Energy Management Portal provides clients with a customised interface, encompassing all aspects of their energy project. Clients no longer have to consult different websites or retrieve documentation from various sources... all relevant information is collated and presented within their Energy Management Portal. It makes the process a lot easier to understand – data is clear, informative and updated in real time... everything is totally transparent.

Ultimately, we're aiming for a sustainable world... there's nothing to hide about that.

### Maximum Runs on the Board

Maximum Energy has been involved in some significant projects in the past two years, all with unique challenges and solutions.

#### PROJECT:

Western Hospital,  
Henley Beach SA

YEAR COMPLETED: 2019

#### BUDGET:

LED lighting upgrade to the entire site, and a 342kW Solar System (\$700,000)

#### SOLUTION:

Zero capital outlay, new and improved lighting, lower maintenance costs and an estimated dollar saving of more than \$1 million over their PPA term.

#### PROJECT:

Goodwood Football Club,  
Goodwood SA

YEAR COMPLETED: 2019

#### BUDGET:

Sports lighting upgrade (\$125,000)

#### SOLUTION:

Design and construct an upgrade of old metal halide lighting to new LED sports lighting. The 20 new lights provide much better light uniformity across the oval without impacting neighbouring residents.

#### PROJECT:

Mount Barker Council,  
Mount Barker SA

YEAR COMPLETED: 2019

#### BUDGET:

Waste Water Treatment Plant Solar Consultancy Service (\$25,000)

#### SOLUTION:

Preliminary designs for a solar power connection from the Mount Barker Eco Centre to the Wastewater Treatment Plant, incorporating a 250kW roof top solar PV system (with provision for an additional 250kW system for any future Eco Centre development). The designs provide Council with the necessary technical specifications and system requirements for the development of the tender proposal.

#### PROJECT:

Christian Brothers College,  
Adelaide SA

YEAR COMPLETED: 2019

#### BUDGET:

130kW Solar Power installation and PPA (\$200,000)

#### SOLUTION:

Installation over two campuses to increase the green footprint of the college, with the added benefit of reducing energy costs by approximately 35%.

#### PROJECT:

Catholic Education Diocese  
Parramatta, Parramatta NSW

YEAR COMPLETED: 2018

#### BUDGET:

LED Upgrades for 10 schools (\$1,000,000)

#### SOLUTION:

Design and install over 7,000 LED lights across 10 schools in Western Sydney. Eight of the schools were completed in just 2 weeks.
